Hope City Council Passes Traffic and Health Ordinances

New Law Puts Time Limit On Parking In Downtown Area
2-HOUR LIMIT MADE
Health Law Would Regulate Public Eating and Drinking Places

Two of six ordinances passed by the Hope city council in a lengthy session Tuesday night are designed to regulate traffic with a time limit for parking in a restricted area of Hope, and regulates public eating and drinking places.

The traffic ordinance, with a two-hour time limit for parking, covers this area:

Beginning at the center of the intersection of the crossing of the Frisco railroad with the Missouri Pacific railroad, which is the center of Pine street (Louisiana street) and Division street; and run easterly along the center of the main line of the Missouri Pacific railroad right-of-way to the intersection of same with the west side of Hazel street.

Thence south down the west side of Hazel street to the intersection of the same with the south side of East Third street.

Thence the same with the east side of Vine street (South Louisiana street).

Thence northerly along the center of Vine street (North Louisiana street) to the point of beginning. The penalty upon conviction shall not exceed \$100, the ordinance read.

The council adopted a motion leasing a plot of ground from the Missouri Pacific railroad at \$12 per year for parking purposes. This plot of ground is north of the Missouri Pacific tracks and south of the Hope city hall. It is between Elm street and the Frisco railroad. It was said this plot of ground would accommodate 45 to 50 automobiles. A railing is to be erected near the railroad as a safety measure.

The traffic ordinance, with the two-hour time limit, covers the hours of from 8 a. m. to 6 p. m.

The Second Ordinance

The ordinance regulating public eating and drinking places in Hope covers such subjects as:

Lighting and ventilation, floor, walls and ceilings, preparing tables, cleanliness and equipment, garbage disposal, dressing rooms, linen, dishes, silverware, cleaning and sterilization, construction of utensils, storage of utensils, general requirements, protection, cleaning and storage, disposal of wastes, lavatories, health of food handlers, cleaning and dusting, health certificates, objectionable connections, domestic animals and other subjects.

Legion Hut Ground

The council passed an ordinance leasing a plot of ground at Elm Park to the Leslie Hutchinson post, American legion. The legion has announced plans for construction of a combination legion hall and community center. T. S. Cornelius is general chairman of the construction project, with C. O. Thomas as chairman of the building committee.

Work is expected to get underway in the near future.

The fourth ordinance passed by the council calls for the purchase of a steam turbine driven centrifugal boiler, feed pump and accessories. The new pump is capable of delivering 20,000 gallons of 210 degrees water per hour.

The purchase price of the pump and accessories is not to exceed \$1,300.

Reduce Meat License

The fifth ordinance reduces the annual meat license fee from \$50 to \$25. The council acted after the presentation of a petition signed by a majority of meat handlers of Hope. The petition asked for reduction of fees.

The annual 5-mill tax ordinance was passed on taxable property in Hope, the funds to go to the general fund to defray the general and ordinary expenses of the city.

Army and National Guard Force 400,000 Ready for Any Emergency in the U. S. A.

This war finds the U. S. Army with more men available, mechanized units replacing cavalry, improved weapons—and even better chow.

Regular Army in 1914 Had 90,000 Has 193,000 Today
Only 6,000 Officers Available Then — Now There Are 100,000
ROTC COUNTED ON
CMTC and the CCC Lists Would Furnish Additional Men

Last of four Patton stories on America's position in the current crisis.

By BRUCE CATTION
NEA Service Washington Correspondent

WASHINGTON — If America was psychologically unprepared for war in 1914, she was even less prepared in a military sense.

Her army was first rate, as far as it went—but it just didn't go very far. It had 90,000 officers and men; expanding it to a force of 400,000 was a job that had to be started from scratch. More than a year elapsed before the army could really begin to make its presence felt on the western front.

No contrast between 1914-1917 and 1939 is more striking than the contrast in military preparedness.

To be sure, the army of 1939 can not assemble a second AEP on a fortnight's notice. Gen. George Marshall, chief of staff, says he will need "great rapidity of action," and points out that the army is still using a rifle nearly 35 years old. But the task of expanding it into a large, ready-to-fight unit will be much more simple than it was in 1917.

Today's Machine Has 193,000 Men

The United States army of today approximately 130,000 officers and 180,000 enlisted men. In the National Guard there are some 200,000 men, who may not be ready for front-line fighting, but who are infinitely better prepared than was the Guard of 1917. A force of nearly 40,000 men, thus, can be called together on short notice.

More important, however, is the officer situation. In 1917 the army had 6,000 trained officers—and needed 180,000. The National Guard had only enough for its own troops. The rest had to be dug up somewhere, sent to officers' training camps for a hurried course of sprouts and then assigned to raw troops whose training they had to share.

Today the situation is entirely different. There are 100,000 reserve officers, who are ready to step into posts of command.

The ROTC in American universities is training 162,000 students, most of whom can be immediately turned into non-coms and some of whom can be commissioned at once. The Citizen Military Training Camps can furnish 35,000 men, of whom about 10,000 are believed ready for commissions.

War Department officials say that a volunteer army can be put together rapidly. For one thing, they remark, the country has 10,000,000 employed men; would not a vast number of enlistments come from that group?

For another thing, it is believed that the 2,500,000 men who have passed through the CCC camps would respond in large number. And while these men have not received military training, they are used to discipline and to routine camp life, and could be turned into excellent soldiers very quickly.

Blue Prints are Ready

Assuming that Congress votes a draft law, there will be much less delay in putting it into effect than there was 22 years ago. The blueprints are all drawn up. The moment the law is passed, the War Department will be ready to act. Even the forms from which the registration cards would be printed are at hand.

As to equipment: the army is not ready to outfit 4,000,000 men overnight, but it is reasonably close to being ready. Fair stocks of clothing are on hand. The new Garand semi-automatic rifle is not yet being produced in quantity, but until it did get into mass production, there is an ample supply of World War Springfield rifles.

The same goes for artillery; the army has a good number of wartime 75's and although its newest field pieces are rated considerably superior to those famous guns, the 75 is still ranked as a good, usable field piece.

In the air, the army is well equipped, though it has somewhat better than 2,800 first-line planes ready to

(Continued on Page Four)

Early German Successes May Not Be Vital on Polish Front

This map illustrates George Fielding Eliot's analysis of the war strategy.

By GEORGE FIELDING ELIOT
NEA Service Staff Writer on Military Affairs

LONDON, Eng.—However stoutly the British and French support the Poles in the present warfare, it will take time for such aid to become effective.

The Germans hope, therefore, to put Poland completely out before the western powers can give much aid, and then attempt to negotiate peace with the Poles on the basis of the accomplished fact of Poland's destruction.

In this situation, the Polish object is to remain a going concern until western help begins to be felt by the Germans. For this purpose, the Poles must keep their army as intact as possible. They must not take undue risks with their rather limited force of fully equipped troops. They must take no chance of having a large part of this undoubtedly fine army cut off in such isolated positions as the Corridor.

The Polish defensive plan has, of course, been carefully made in advance. It does not include any desperate attempt to hold the Corridor itself, for this would risk pinching off many troops between German Pomerania and East Prussia.

Instead of this, the Poles intend to leave only a few rear guards in the Corridor area. The whole mind of every road and railway bridge in the Corridor area. They have mindfully fall back to prepared positions farther in the rear.

This retreating action, however, has the disadvantage of enabling the Germans to announce early success, which their propaganda department will greatly magnify. These early announcements, such as are now coming through, should not be given undue significance.

Chief German Drive Aimed at Southwest

Germany's main and most dangerous attack is drive against the southwestern end of Poland, at Katowice, the first objective and Cracow the subsequent objective.

The frontal attack from Breslau toward Katowice appears to be taking place on the basis of early reports. This will probably be supported by an attack of two columns from Slovakia, directed respectively on Katowice and Cracow.

The German object in these drives is to retain the mining and industrial region of Upper Silesia, which was lost to Germany in the last war. Eventually the Germans will seize the Galician oil fields.

The advance toward Cracow might, if successful, develop into a further attack on the new Polish industrial triangle south of Warsaw.

In all this southwestern region, Polish resistance may be expected to be stronger than in the defense of the Corridor.

Katowice is in the heart of a congested industrial region, and it may be difficult to defend because of the character of this district and its nearness to the frontier.

The development of a German offensive against Danilowka on the southern frontier of East Prussia, only about 80 miles from Warsaw, may mark the initiation of a German attempt to rush a highly mobile force with a spearhead of mechanized troops, toward Warsaw.

Air bombings of many Polish cities, including the capital, appear on the basis of early press reports to have been confined to military objectives, as the Germans claim. Great industrial resources may thus be inflicted, but on the whole Poland does not present many attractive targets for bombers.

Poland will therefore not be defeated until her army is decisively beaten and to a large extent destroyed—which will be difficult, indeed, in a country cut up by woods and lakes, devoid of good roads, and defended

First Advance on Western Front Is Reported in Paris

British Beat Off German Air Raid Before Bombs Are Dropped
GERMAN SHIP SUNK
Plight of Warsaw, Polish Capital, Steadily More Desperate

BULLETINS

PARIS, France — (P) — French General Staff announced Wednesday its armies were progressing beyond the frontier into Germany.

PARIS, France — (P) — Strasbourg, capital of Alsace which France won from Germany in the last war, was reported Wednesday night to have been emptied completely of civilians before an artillery duel started between the French and German southern and northern flanks of the Western front forces.

BERLIN, Germany — (P) — The German liner Bremen, whose whereabouts have been a mystery since she sailed from New York last Wednesday, was reported Wednesday night to have arrived safely in an unidentified neutral port, safe from British warships.

PARIS, France — (P) — Reports reaching here Wednesday from Basel, Switzerland, said, "Games could be seen which Swiss observers believed came from an explosion at the great German Zeppelin factory at Friedrichshafen."

PARIS, France — (P) — The French army Wednesday night was reported to have advanced the German frontier into the rich Saarland, once the backbone of German industrial life.

A brief army communique of "local advances" on the Maginot line skirting the frontier was interpreted by military observers to mean that German territory had been penetrated.

Previous advices indicated the French were concentrating Western front operations on the German northern flank which protects the Saar basin barely behind the German frontier.

It also was reported here that successful air raids had been carried out on Eschweiler and Stolberg, war supply centers near the German-Belgian frontier.

Warsaw Digs in

BUDAPEST, Hungary — (P) — The Polish radio appealed late Wednesday to all citizens to report to the nearest police station with spades to dig trenches around Warsaw. The broadcast said all man-power was needed.

Warsaw Apparently Doomed

WARSAW, Poland — (P) — The situation here steadily grew more ominous Wednesday with the expectation in some quarters that German troops pressing from the north would arrive by nightfall.

The Poles plan to defend Warsaw beyond the city limits to the best of their ability, with a bitter battle generally expected.

While the Nazi troops were approaching ever closer they apparently had not reached the river Bug 25 miles north. No retreating soldiers have yet been seen here.

A communique said motorized enemy units had reached a point 35 miles north of here.

England Beats Off Raid

LONDON, Eng. — (P) — The information Ministry announced Wednesday afternoon that British anti-aircraft batteries and fighting planes had repulsed enemy bombers which attempted to raid the east coast of England early in the day.

Along the coast batteries opened up with a terrific din. Puffs of smoke filled the sky. Squads of fighters went aloft, and the sound of machine-gun fire could be heard.

The ministry announced that the bombers in their first attempt on Britain had been driven off before any bombs were dropped.

No combats were seen from the ground.

Poles Near End

BERLIN, Germany — (P) — Capture by the German army of Krakow, often spoken of by the Poles as "Poland's heart," was officially announced Wednesday. Krakow is 100 miles southwest of Warsaw and about 60 miles

(Continued on Page Four)

U. S. Prices Soar in Staple Markets

High - Grade Securities Sold to Get Funds for Speculation

NEW YORK, (P) — Prices shot upward in the nation's stock and raw staple markets Tuesday. Speculative commodities such as grains, rubber, wool, and hides, went flying in a manner surpassing anything seen on any day in the World War years or in the price boom when the dollar was taken off the gold standard in the spring of 1933.

The stock market jumped \$1 to more than \$15 a share, in the most violent surge of prices since March 15, 1933 when they snapped back spectacularly after the banking holiday.

There was a rush to sell high grade bonds and other conservative investments to raise cash for "war" speculation. United States Treasury bonds, in the heaviest trading ever seen in the heaviest trading ever seen in the Stock Exchange, surpassing even the post-war trading frenzies in Liberties, again sagged, although still holding well above par.

The Associated Press daily price index of 35 basic commodities had the unprecedented rise of 3.31 points to 123.1 per cent of the 1926 average level, the highest in 17 months. Three weeks ago it was the lowest in five years.

Some Wall Streeters expressed concern over the fervor of the buying, lest it bring federal intervention to stabilize prices. Wall Street was thronged with excited and smiling faces, in contrast with its lackluster atmosphere of many months. Brokers' customers rooms were filled, reminiscent of 1929.

Several of the commodity markets, where options for future deliveries were traded, have rules governing maximum fluctuations permitted in any one day, and in several of them, trading all but ceased after prices reached the limit.

This was true in wheat and corn at Chicago, up five and four cents a bushel.

CRANIUM CRACKERS

Colorful Wires
Noodle Nudgers, No. 2.

When there is a break in the telephone service to some station it is often necessary to distinguish the wires to that station from many others twisted together in big cables. This may be accomplished by the use of colored insulation covering on the wires. Combinations of not more than two colors are used on each wire. The colors used are blue, orange, green, brown, slate, and white. How many distinctive wires may be provided from these colors, and what would be the colors used in the combination on each wire? Answers on Page Two

U. S. Establishing Patrol of Coast

Patrol Will Keep Tabs on Ships of All Belligerents Here

WASHINGTON, (P) — Upon instructions from President Roosevelt a patrol of navy and coast guard vessels and airplanes is being established to spot vessels of belligerents off the American coast.

Stephen Early, presidential secretary, announced Wednesday that the step was taken as a precautionary measure and for informational purposes only.

Uniforms — It was decided to purchase 58 dress coats for the patrol. These will make necessary some uniforms at a cost not to exceed \$800 each. The purchase of new uniforms was to be deferred until a time when they will be needed in the spring, had an appropriation was made for 6 new uniforms, cost not to exceed \$25 each. Total for uniforms \$1,466.40.

Instruments — A set of tympani (kettle-drums) will be purchased, cost not to exceed \$300.

Music — In order to take care of new students in the high school, a second band is in process of being formed. This will make necessary some additional music of the other two bands (High School 1st band and the Oglesby band), \$150 was appropriated.

Trips — The state contest trip in the spring was estimated at \$275. For all other trips, including football games away from home, clinics, etc. the amount of \$150 was set aside. Total \$425.

Awards — \$20 is allowed for the purchase of band letters.

Band supplies and Equipment — There are several needed items covered by this appropriation. A tuning fork is needed, also more large music folders since the old ones are worn out. New small folders are needed to protect paper, mending tape, and other things, amount \$75.

The total amount of the budget as set up for 1939-40 is \$1,166.40. Last year's budget was \$895.

The report was signed by Mrs. Leon Early, Mrs. D. L. Bush, Mrs. E. P. Young, Mrs. H. O. Kyler, Mrs. C. Cook, Miss Bert Henry, Thomas Cannon, director.

Body of Branham Taken From Lake

Diver Still Hunts for Body of Manning, Drowned With Him

HOT SPRINGS, Ark. — (P) — The body of W. D. Branham, 40, Little Rock business manager of the Arkansas Democrat, was recovered from Lake Hamilton at 11 a. m. Wednesday by Captain N. A. Danese, 75, New Orleans diver.

Branham and H. Grady Manning, 47, Little Rock, hotel chain executive, were drowned Monday when they and their wives were thrown from Manning's boat. The wives were rescued.

Flans were made to turn the body over to a Little Rock undertaker.

The search for Manning's body continued.

Public Concert Friday at Guernsey High School

A public concert will be held Friday night at Guernsey High School auditorium, beginning 8 o'clock. This is the closing program of a singing school which has been in progress at Guernsey the past two weeks.

Quartets are expected from Texarkana, DeQueen, Prescott, and two from Hope. Odell Brothers and the Hope quartet. The public is invited.

Paris publishes a special newspaper for beggars.

Budget Is Raised By Band Auxiliary

Necessary for Operations During Year of 1939-40

The budget committee of the Hope Band Auxiliary presented its report for the year beginning Oct. 1, 1939, at the regular meeting of the club Tuesday afternoon at the high school.

The report is as follows:

Uniforms — It was decided to purchase 58 dress coats for the patrol. These will make necessary some uniforms at a cost not to exceed \$800 each. The purchase of new uniforms was to be deferred until a time when they will be needed in the spring, had an appropriation was made for 6 new uniforms, cost not to exceed \$25 each. Total for uniforms \$1,466.40.

Instruments — A set of tympani (kettle-drums) will be purchased, cost not to exceed \$300.

Music — In order to take care of new students in the high school, a second band is in process of being formed. This will make necessary some additional music of the other two bands (High School 1st band and the Oglesby band), \$150 was appropriated.

Trips — The state contest trip in the spring was estimated at \$275. For all other trips, including football games away from home, clinics, etc. the amount of \$150 was set aside. Total \$425.

Awards — \$20 is allowed for the purchase of band letters.

Band supplies and Equipment — There are several needed items covered by this appropriation. A tuning fork is needed, also more large music folders since the old ones are worn out. New small folders are needed to protect paper, mending tape, and other things, amount \$75.

The total amount of the budget as set up for 1939-40 is \$1,166.40. Last year's budget was \$895.

The report was signed by Mrs. Leon Early, Mrs. D. L. Bush, Mrs. E. P. Young, Mrs. H. O. Kyler, Mrs. C. Cook, Miss Bert Henry, Thomas Cannon, director.

Cotton

NEW YORK, (P) — October cotton opened Wednesday at 8.91 and closed at 8.99. Spot middling 9.49.

Alabama Approves State Stock Law

All Counties Affected Unless They Vote Selves Out of It

MONTGOMERY, Ala. — (P) — The Alabama legislature Tuesday enacted bills establishing a statewide stock law and permitting aged supreme court justices to retire to a superannuated status at \$4,000 annually. Administrationists predicted Gov. Frank M. Dixon would sign both bills.

The senate passed the stock law bill, 22-8, after writing in amendments which will withhold its effectiveness until March 1, 1941, and allow existing stocklaw precincts to continue on this basis when a county votes under the new law, so far as cattle are concerned.

Fencing in of all hogs, goats and sheep will be mandatory throughout the state, and a county must vote itself out from under provisions of the law if it chooses to let cattle range at large. Livestock must be kept off highways, and no owner can claim damages for an animal killed by a vehicle, unless the driver "wantonly and maliciously" struck it.

Under the Supreme Court retirement bill, justices must be at least 70 years of age and have 15 years service. Superannuated terms will be for 12 years. It passed the house, 43-42. Quick senate concurrence was given a house amendment cutting the retirement pay from \$5,000 to \$4,000. The house gave immediate concurrence to senate changes in the stock law bill.

Liberty Hill Singing

Liberty Hill community, five miles south of Hope on Highway 29, will hold a community singing Sunday night, September 17. The public is invited and several quartets have promised to attend.

Eagles have been known to live more than 100 years.

Torn-Out Pages of Versailles Treaty Strew Europe

When the 125 peace-makers finished their five-month wrangle at Versailles
and emerged in June, 1919, with a treaty of 543 pages, the world saw a document
such as it had never seen before.

Though it is the custom today to deride this voluminous pact, it is likely
that no war settlement before it embodied the results of so much study or so
comprehensive an effort to set up an order that gave hope for the future.

The ink was scarcely dry on the signatures, however, before pages began
to be torn out of the treaty. The United States refused to sign, or to join the
League of Nations set up in the first part of the treaty. The provisions for
trial of the kaiser and other German leaders were never carried out.

The reparations provisions went next. Scaled down under the Hoover moratorium of
1931.

Disarmament of Germany was at first enforced, but none of the other
signatories ever disarmed as provided by the treaty. Germany then tossed
the disarmament provisions into the wastebasket in 1935 and violated other
clauses by remilitarization and fortification of the Rhineland. The Kiel
Canal, internationalized, was retaken by Germany, and Heligoland refortified.

The independence of Austria and of Czechoslovakia were specifically guar-
anteed by the treaty. Germany has conquered both, and seized Memel. It
now threatens the independent existence of Poland, similarly guaranteed.

Some of the provisions, like the Saar plebiscite, have been carried out.
Others, like those providing exchange of prisoners, are obsolete.

Gradually the pages have been torn from the voluminous book of Ver-
sailles, and their fragments scattered all over Europe. What remains of the
treaty?

Of its 440 articles, about 125 still have nominal force. They cover:

Guarantee of the complete independence of Latvia, Lithuania, and
Estonia. The League, cession of Alsace-Lorraine to France and the status of
East Prussia. Renunciation by Germany of her overseas possessions, and of
rights and leases in China, Siam, Liberia, Morocco, Egypt, Turkey and Shan-
tung. Certain regulations over air and railway traffic, and a provision for
mutual respect for the graves of the war dead.

At present not even that last pitiful provision seems safe.

It is clear, as the last remaining leaves are stripped from the book of
shall be carved out in a civilized manner or molded from a muck of blood and
Versailles, that the world faces a new era, not foreseen in 1919. Whether it
will be known within a few days.

It should be clear that only the former course offers any chance of better-
ing Versailles.

Super-Soft Mattresses, Eye Shades, Ear-Stops Add Comfort to Sleep

Third of four articles on sleep. Bed-springs on the ground, sometimes
City dwellers take great pains in
purchasing sleeping equipment. It
is possible not only to get mattresses
which are especially designed for
good sleep, but also eye shades to
keep out the light, ear stops to keep
out noise, and many special kinds
of pillows.

a soft mattress, a spring mattress or
a solid mattress.
So-called in orthopedic surgery
say certain forms of mattress prevent
spinal curves by placing stress on the
bones of the spine.
The argument has been made that
a sag in the middle of the bed is bad
for good sleep. Dr. Nathaniel Kleit-
man, who seems to be quite skeptical
points out that a cat sleeps curled
up, that the Japanese sleep on the
ground and do not make it conform
to the curves of their bodies, and
that sailors who sleep in sagging ham-
mocks sleep quite soundly.
The sagging of a mattress and bed-
spring may discourage frequent chang-
ing in position of the sleeper once
he has become used to that particular

mattress and spring. Most of these
mattresses seem to be questions of in-
dividual likes and dislikes.
This is true also of bed covers.
Some people sleep better on cool
nights with a full covering of quilts
and blankets. Others sleep better
when they use no covers. There are
some people who cannot sleep well un-
less they wear gowns or pajamas.
Others insist the only way they can
sleep well is "in the raw."
A few sleepers insist the only way
to sleep comfortably is with the face
and stomach down. Others never
feel well unless they are lying on their
backs.
Before there was suitable indoor
heating, it was customary to use a
bed warmer. Some people prefer an
ice-cold bed. They say they fall asleep
quicker as the must lie still in order
to warm up the part of the bed with
which they are in contact.
It ruined all his pets and wouldn't
fit in his bed. From the descrip-
tion this sounds like the one that's be-
getting away from so many love
members.
A cowboy actor objects to hug-
ging and kissing scenes. They must
be casting him with some wicked-
need leading woman.
A Wisconsin man has been barber-
ing for 51 years. Wonder if he's given
up trying to sell the shampoo, must-
have an electric combination?

SOCIETY

Mrs. Sid Henry

Telephone 321

We may live without poetry, music, and art.
We may live without conscience, and live without heart.
We may live without friends; we may live without books.
But civilized man cannot live without cooks.
He may live without books—what is knowledge but grieving?
He may live without love—what is hope but deceiving?
He may live without love—what is passion but pining?
But where is the man that can live without dining? From Owen Meredith's "Lucile" — By Request.

The Pat Cleburne chapter U. D. C. will meet Thursday afternoon at three o'clock at the home of Mrs. A. F. Hangan, South Elm Street, with Mrs. J. P. Gorin as joint hostess. A full attendance is urged, as business of importance will come before meeting.

The following announcement from the Texarkana Gazette will be of interest to Hope friends of the bridegroom, whose grand father and father were former well-known citizens of our city.

A wedding of great social interest in the city, because of the prominence of the principals, was that of Miss Janice Meredith, attractive daughter of Mrs. L. A. Meredith of Sherman, Tex., and William Barry Oglesby of Texarkana, which was solemnized at eight p. m. Wednesday. The ceremony was performed by Dr. Stuart Oglesby, pastor of Central Presbyterian church of Atlanta, Ga., uncle of the bridegroom, at the Central Christian church of Sherman. A large attendance of relatives and friends were present, and the simple ring ceremony was used. Vows were exchanged before an improvised altar of palms and ferns, with tall baskets of pink gladioli and seven branched candelabra, with athena lamps standing out in the background. Mrs. R. Chambers played a beautiful program of wedding music during the ceremony. For the convenience of the bride party she played

the traditional Bridal Chorus from Wagner's "Lohengrin" and used "Trautner" as a ceremonial. Mrs. Ray Locke sang "O Promise me" and "I Love You Truly" accompanied by Mrs. Chambers. Miss Elizabeth Oglesby of Texarkana, sister of the bridegroom, was the bride's only attendant. She wore an afternoon dress of gold crepe with brown hat and accessories, and wore a corsage of Talisman roses. The lovely young bride was given in marriage by her brother, William S. Meredith of Ada, Oklahoma. Her wedding costume was an afternoon dress of Madonna blue crepe, and with this she wore black accessories and heeled gloves. A cluster of gardenias fastened her bridal corsage. The bride and her bridesmaid were met at the altar by Mr. Oglesby and his best man, Stuart Oglesby III of Atlanta, Ga. Ushers for the ceremony were Haydon Meredith, Jerome Hix, Paul Terrell and Lewis Hall all of Sherman, Texas. An informal reception at the home of Mrs. Meredith followed the wedding, members of the families and out of town guests having been invited. Following the ceremony the young couple left for Dallas for a wedding trip. After September 17, they will be at home at Richmond, Va., where Mr. Oglesby will be at the head of religious work for the Masonic Orphanage of Home, while attending Union Theological Seminary. The bride a general favorite in social

circles attended Austin College at Sherman, and Texas State college for Women at Denton, and was a member of the faculty of the Throckmorton, Texas schools for the past year. Mr. Oglesby was graduated from the Texarkana, Ark high school, Texarkana College, Austin college and has been attending Union Theological Seminary at Richmond. During the past summer he served as pastor of the New Iberia Presbyterian church of New Iberia, La. Among the out of town guests for the wedding were Mr. and Mrs. Mac Oglesby and daughter Louise of Lewisville, Mr. and Mrs. W. B. Oglesby, Mr. and Mrs. Stuart Wilson, Mrs. Paul Booker of Texarkana, Mrs. J. T. West and Miss Hattie Anne Field of Hope.

Miss Ruth Taylor requests that the senior girls taking Home Economy meet with her between the hours of nine and ten Friday morning at the Home Ec. Cottage, for the purpose of talking over the project work for the coming year.

Mr. W. O. Reece announces the marriage of his daughter, Mary Ellen to Royston Green, son of Mr. and Mrs. O. T. Green, Nashville, Arkansas. The marriage was solemnized at the home of the officiating Minister Rev. Kenneth Spore, Saturday September 2.

Card of Thanks
We take this method of thanking our many friends who were so kind and helpful to us during the sickness and death of our dear Mother and sister. Also for the beautiful floral offerings.
May God's richest blessings be upon each of you.
Mr. and Mrs. Frank Evans and Family
Mr. E. H. Ellis
Mr. Morris Ellis
Mrs. A. Tyler

SERIAL STORY

WORKING WIVES

BY LOUISE HOLMES
COPYRIGHT, 1939, NEA SERVICE, INC.

Yesterday, Marian Harkness, 22, successful private secretary, was unable to understand why her husband, Dan, has lost his job. She hates their purposeless life, but realizes it is too late to change.

CHAPTER II

Marian went back to the bedroom. Painstakingly, she glossed her lips with tangerine. It was the last touch of brittle artificiality. While adjusting her veil, she heard Dan leave the apartment. He would have the car at the building entrance when she went down. She heard him speak to Dolly, a warm, friendly note in his voice.

Dolly lived in one of the small court apartments across the hall. She was the widow of Dan's brother, living on a tiny income, augmenting it by doing Marian's housework at 40 cents an hour.

Marian threw the beautiful fox cape around her shoulders. She had the impersonal sleekness of a mannequin, a poured-in, glossed over smoothness. Pulling on spotless gloves, she left the apartment. Dolly's door stood open.

"Hello, there," Marian called. She had trained the harsh tones out of her voice, it was low and cultured.

"Good morning—how nice you look, Marian—but you always look nice." With cheerful envy Dolly observed Marian's smart sophistication.

Dolly was short and round and fair, pretty in a sweet, comfortable way. Although she was 28, there was a childishness about her, an irrepressible gaiety. She wore a clean cotton dress, honey-colored hair curled around her fresh face. Dolly would work hard in Marian's apartment all morning, play

contract or see a picture in the afternoon, mend Dan's clothes, read or knit during the evening.

Just why Dolly's mode of life should add to Marian's discontent, she could not have told. Dolly had nothing. She scrimped and saved to buy an annuity for her old age. Old age—Marian shivered.

"Put two potatoes in the oven at 5:30, will you, Dolly?"

"All right—I'm going to bake an apple pie and I'll give you half." She leaned from the door as Marian went down the hall. "Let up a little, Marian," she called. "Your eyes look tired."

THE stairs were nicely carpeted, the foyer had a quiet, luxurious air. Marian wondered where she and Dan would be living if she hadn't helped out. In her mind she always called her work helping out. Certainly Dan would not have been able to pay \$75 a month for an apartment. It was one of her annoyances that he never appeared grateful.

He waited at the curb and she got into the car. It was a cheap car, provided by Dan's company. Silently, they drove downtown.

The October morning sparkled through a warm haze. The coming of autumn depressed Marian, it meant that winter was crowding close behind. And winter brought Thanksgiving Day and Christmas, family days which should be festive and gay, but which were not. She and Dan had been married in October, the gold of the day shot with crimson and sober brown.

For an instant Marian's eyes, flashing resentment, rested on Sally. "I'll call you if we need you," she said, her soft voice belying her feelings.

office of the Grant Fellows Brokerage Firm, speaking graciously to the telephone operator, the stenographers and office boy. They returned her greeting courteously. She had hired these girls and that boy, she had the power to dismiss them. It was natural that they should stand a little in awe of her.

ONCE, a long time ago, she had sat at the last typewriter, gazing with purposeful eyes into Grant Fellows' private office each time the door opened. There had been a secretary then, Angie Dalton, a poised, beautifully correct person of 30 or more. Angie Dalton had engaged Marian and trained her. Later, dismissing Marian's aspirations toward the private office, she had discharged her with two weeks' pay. Grant Fellows, himself, had sent for Marian and reinstated her.

Soon after that, Angie had been given a year's leave of absence and Marian had taken her place. Angie had never come back. Marian had forgotten Angie, only to remember her with increasing frequency as the years passed and young, ambitious girls came into the office.

She had trained the girls with care, dilly nipping away yearning toward her own envied position. Until a few months ago she had been quite successful. Recently Sally Blake had become a major problem. Sally was more than a little responsible for the perpetually line between Marian's brows.

Sally had applied for a position as stenographer. There had been something about the girl, an avidity, a subtle determination, that Marian had recognized at once. She had told Sally that there was no opening, that she might leave her name.

Later that day, when Marian returned from lunch, Sally had sat at one of the typewriters. Resolute, not to be put off easily, she had waited for Marian's lunch hour, seen Grant Fellows personally, and been given the job.

It had been a blow to Marian. Grant Fellows had never before questioned her authority and she

resented it hotly. Relentlessly, she had kept the girl in the back ground. But, in spite of her vigilance, Sally was making headway. She was delightful to look at, sweet-natured, by far the most efficient of the several stenographers. Day by day Marian watched for cause to dismiss the troublesome Sally. The girl gave her no cause. And, just recently, her competency and personality had been noted in the private office.

The fact that Sally was exercising the same skill and enterprise which had brought Marian to the front, that her tactics were identical, added to Marian's uneasiness. She knew what Sally wanted. Sally wanted the place as Grant Fellows' private secretary. And, what was more to the point, she was steadily gaining ground.

"Five Came Back" Is Hailed as Year's Most Sensational Picture

In "Five Came Back," soon to be shown on local screens, a notable group of stars is seen in what is said to be the most memorable and gripping film to the year. At the head of this group are Chester Morris, Lucille Ball and Wendy Barrie.

The plot deals with the forced landing in a Brazilian jungle of a transport plane carrying eleven persons, and with the drama that surrounds their efforts to escape. A trick of fate puts forward a confessed murderer as the sole arbiter of the destinies of the little party, thus contriving one of the strongest climaxes the screen has ever revealed.

Twelve persons are aboard the plane when it leaves the United States for Panama. One is hurled from the ship during a tropical storm, and the other eleven, landing safely in a clearing in the wilds, seek to repair the craft and fly out.

Trouble and disaster strike, while two romances spring up between four of the little party. One of the group is captured and killed by Indians, another is fatally wounded holding off a native attack. And when the crippled plane is finally ready to start for the coast and civilization, it is found that it will carry only five of the survivors; the other four must remain behind and face certain death at the hands of the enraged Indians.

How the five who come back are chosen by the only person among them who can make an impartial choice, forms the tense conclusion of the film's story—and ending that will be long remembered.

The various roles, each sharply etched against the steaming background of the upper Amazon, are handled by an all-star cast. Chester Morris and Kent Taylor enact the roles of the two pilots, and Lucille Ball and Wendy Barrie have the romantic leads opposite them, Miss Ball as a politician's girl-friend taking a hurried trip for her health, and Miss Barrie as an heiress.

Joseph Calleia plays the part of an anarchist being taken back to a Central American country by Detective John Caradine to stand trial for a political killing, and Allen Jenkins is seen as a gangster escorting his chief's title boy, young Casey Johnson, out of harm's way during a gang war.

C. Aubrey Smith and Elisabeth Risdon enact a scientist and his wife, and Patric Knowles, as a selfish

WHAT IS A SLEEPER?
In the language of the movie business, a "sleeper" is a picture that comes through the studio unheralded — unpress-agented — almost unnoticed — AND TURNS OUT TO BE A BIGGER SENSATION THAN THE "SUPER COLOSSALS!"
Such a picture is "Five Came Back" in which an airliner was forced down in the jungle. Only five of twelve can escape! Which five? See how they choose! ... Dramatic, stark, startling! Never before has a film been made like "FIVE CAME BACK" ... Folks, you'll thrill to this sensational thriller.

Dutch Meyer, Famous T. C. U. Grid Coach, Reveals Passing Secrets

Free Arm Movement and Proper Temperament Under Pressure Are the Prime Requisite of the Passer

By HARRY GRAYSON
NEA Service Sports Editor

Leo R. Meyer's advice to coaches is to get rid of their throwers and pitch their passes.

Free arm movement and proper temperament are the prime requisites of the passer, according to Dutch Meyer, famous coach of Texas Christian University and foremost exponent of the aerial game.

The man who turned out Sammy Baugh and Davey O'Brien doesn't care how a boy throws the ball if his arm is loose. If he has free, easy movements.

"If he pushes the ball out there like a woman, you had better forget him," the Horned Frog drillmaster tells a coaching school in the Man Building of the New York World's Fair. "He may be a fair passer, but he'll never be a good one if he does that."

"And I don't want some jitterbug trying to pass for me. I want poise under pressure."

"In this connection, I impress upon the passer that it is no sin to be thrown for a loss trying to get a pass. I teach him, too, the necessity of getting rid of the ball."

"When he is hemmed in by rushers and no receiver is open, then he can throw the ball into some empty spot beyond the line of scrimmage."

Someone is supposed to be where the ball is thrown. "Intentionally grounding the pass? Sure it is, but what official is going to call it if the ball crosses the line of scrimmage?"

"I'd be right out there backing up my passer in his argument to the referee that there was supposed to be someone where he threw the ball."

"So you see the necessity of getting rid of a thrower. . . someone who just blindly heaves the ball away."

"We allow the passer to use either his thumb or fingers on the lacing. Most of them prefer the thumb. Put it on the second lace."

"The pointing finger is the last to leave the ball. On the follow through it should be pointing where the ball is going. We think that helps in direction and accuracy."

"Passers should hold the ball above the waist and out from the chest. It should not be clutched tightly to the ribs."

"The passer should be relaxed until he is ready to shoot."

No Place for Wind-up Pitchers in Passing. "You don't want any wind-up pitchers. The passer should cock the ball behind his ear and let it go quickly with a snap of the wrist like a baseball catcher throws to the bases."

"The feet should be on the line of the throw. The hands direction. The passer can fake with the feet toward one spot, but should resist them before letting the ball go."

"Some throw a heavy pass and others, throw just as hard, throw a pass that is easy to catch."

"We think this is because of the way in which the nose of the ball is tilted."

"A pass thrown with the nose of the ball down is the hard one. With the tip of the ball up a little when the pass is thrown, it comes to the receiver easy."

"The passer should throw just when the receiver is breaking away from his coverage, not when he is out in the clear."

"If the passer waits until the receiver is out in the clear, the receiver may be covered again by the time the ball gets to him."

Pass Receiver Must Be an Accomplished Actor. Meyer has his athletes "bullet" short passes and lob long ones. "Bullets" minimize the possibility of interception and blocking in close quarters.

As a receiver, Meyer would rather have a good actor with less speed than fast man who is a poor actor.

"Old Man Rockne could teach acting better than anyone in the game," smiles the Fort Worth instructor. "He knew the value of deception."

"Get me a good receiver like Don Hutson, the Alabama boy with the Green Bay Packers, and I'll get some guy who can throw at him anyway."

Meyer stresses that the adoption of the professional rule permitting passing from anywhere behind the line of scrimmage would make collegiate football wild as Texas.

Opponents of Texas Christian have for some time been convinced that it is in that state already. . . without giving the passing game any further leeway.

It is in that state already. . . without giving the passing game any further leeway.

Any Football Team Could Use an Open Field Runner Like This

Nipper, the Marquette University football team's Great Dane mascot, takes punt in Milwaukee. Adept at reversing his field, he easily outdistances would-be tacklers. The only thing he couldn't do was kick goal.

Facts Concerning Education In Arkansas Discussed By Lieblong

Fulton Principal Releases Data Regarding Arkansas Schools—Will Deal With Hempstead County Facts In Second Article

J. L. Lieblong, principal of Fulton public schools and Hempstead county chairman of the Public Relations Committee, Arkansas Education association, has assembled many facts and figures concerning education in Arkansas.

The following is the first of a series of articles by Mr. Lieblong. The first deals with Arkansas education in general. Other articles will give the entire faculty list of every white school in the county, the opening and closing dates for each school and other matter regarding education.

The first story by Mr. Lieblong follows:

There are 620,560 people of school age, that is 6 to 21; of these 162,926 are negroes.

Out of the number enumerated only 465,272 are enrolled in school.

And out of those enrolled there are 357,812 in average daily attendance.

There are 59,852 children enrolled in grades 9-12 and the average daily attendance with this group is 87.1 per cent of the enrollment.

10,887 young people between the ages of 14 and 20 or more graduated from high school in 1938.

There are only 37 private elementary schools and 14 private secondary schools in the state.

And in these private schools there are 3856 enrolled in the elementary grades and 1400 in high school.

There are 142 superintendents and 123 supervisors and principals; there are 12,738 teachers, and 3047 clerks, janitors, bus drivers, etc.

A total of 16,050 employees then, to be paid from public school funds.

There are 3062 school districts in Arkansas.

The smallest district is less than two square miles in size.

The largest is over 600 square miles.

The state has an assessed valuation of 415,322,075 or a average of 135,637 per district, but in the county with the largest assessed valuation (54,553,107) there are three districts and in the county with the smallest assessed valuation (805,500) there are 65 districts.

There are 3834 buildings used strictly for elementary school and 70 used for high school while 848 buildings house both groups.

Of the 4738 school buildings in the state there are 2667 with one room only, 276 with ten or more rooms and the rest of them range in size from two to nine.

Education raises persons above their surroundings and makes them masters of themselves, rather than merely being creatures of circumstance. It is not enough merely to know how to

Regular Army in

(Continued from Page One)

go, and is well fixed to provide replacements, to make further expansion.

The one sizeable fly in the ointment is the fact that the training of the army and the National Guard showed some rather substantial defects in the recent maneuvers in Virginia and New York.

Some Polish Needed. Although the army is not scattered around in isolated posts to anything like the extent that prevailed in 1916 it still remains true that opportunities for training and maneuvering by divisional units are rare.

Assuming that the existing army and National Guard are formed into a striking force of 400,000 men, that force will not be ready to take the field at once. It will not need as much polishing and improving as did the first units sent overseas in 1917, perhaps, but it will need some.

The army has kept pace with overseas armies in the development of scientific war gadgets. Most of these to date, exist in small quantities only, and will not be available for widespread use until factories have been retooled to go into mass production with them.

Army men feel, however, that the industrial surveys which have been made and the educational order system which has been instituted will make it possible for mass production to begin quite rapidly. As one officer expresses it: "By the time we had the men trained, we'd have the equipment ready."

tonsils causing sore throats, and colds and abscesses from school.

The eyes and ears, very important organs in school work, should be tested. Most half school children require dental attention.

First Advance on (Continued from Page One)

east of the German-Polish border.

With the announced capture earlier in the day of Kielec, the German armies had reached another goal only a short distance away from Samborz, Polish munitions center.

With the fall of Krakow and industrial centers in Silesia, the official German belief is that effective Polish resistance is near an end.

Official reports indicated "all quiet" on the Western front in the third day of the French-German state of war.

German Ship Sunk. BELEM, Brazil.—(AP)—The North German Lloyd liner Inn, which sailed from here for Hamburg, Germany, August 25, was announced Wednesday to have been sunk in mid-Atlantic.

The announcement gave no details. The Inn was registered as a motor-ship, Diesel-powered, of 2,867 gross tons, 295 feet long, and her home port as Bremen.

Officials said the Inn carried a crew of 30, but expressed the belief no passengers were aboard.

125 Missing From Athenia. LONDON, Eng.—(AP)—Winston Churchill, First Lord of the Admiralty, told the House of Commons Wednesday that 125 passengers on the sunken liner Athenia were still unaccounted for.

He asserted a submarine torpedoed the liner and "fired a shell which exploded on her middle deck."

Before his statement was made an unofficial compilation indicated the death toll was only 49.

Warsaw Apparently Doomed. BUDAPEST, Hungary.—(AP)—Diplomatic dispatches from Warsaw early Wednesday said the German army after a lightning advance from the north was shutting the city.

The Polish capital, already evacuated by the Polish government and foreign embassies and legations, was described as partially destroyed under the heavy bombardment.

While the German forces were reported to be shelling the city heavily, airplanes conducted continual raids.

The government was said to have fled to Lublin, 90 miles southeast of Warsaw.

Resignation Reported. Unconfirmed reports received here early Wednesday said Marshal Edward Smigly-Rydz, head of the Polish army, had offered his resignation to President Ignacy Moscicki.

Diplomatic dispatches said that all Americans already had left Warsaw by the time of the attack except an official of the American embassy left behind to protect property of the American government.

The diplomatic reports said the Ger-

mans early Wednesday were less than 50 miles from the capital and moving rapidly through a broken Polish front.

The dispatches suggested that the Poles if unable to stem the advance of the Nazi troops, would take up positions on the east bank of the Vistula river, which runs through Warsaw.

Hard Going for French. PARIS, France.—(AP)—The left wing of the French army Tuesday increased the pressure on the northern flank of the German forces along a 10 mile front. Army communique No. 4 Tuesday said simply:

"Our troops are in contact everywhere along the frontier between the Rhine and the Moselle. It is recalled that on the Rhine permanent fortifications border the river here and there."

This 100-mile frontier, where the French Maginot line faces the Nazi Siegfried line at some places a little more than a stone's throw distant, forms the northern flank of the German line.

This German line makes a sharp bend in the vicinity of Koblentz, Germany, where the French frontier juts out into a point forming the northeastern corner of France. The line follows the Rhine south to Switzerland.

The main attack was to the southward, where the Burgundy gate passage between Vosges and the Alps leads to the German Black Forest. Here apparently was concentrated an artillery barrage.

Nazi Fortifications. The last line of the General Staff communique reminded the French, who are becoming impatient for news of an offensive on a grand scale, that permanent fortifications guarded the line of the Rhine.

Semi-official sources said the French were trying to soften the southern German lines while the northern forces were clearing hills and valley near Luxembourg before starting any major machine-gun nests dot the territory between the two fortifications.

Northern operations were believed to have brought the opposing French and German forces in more direct contact than in the south.

It was stated the activities had not advanced far enough to merit more than the official announcement that operations "develop normally."

The French action was co-ordinated with Poland's efforts against Germany.

U. S. Prices Soar (Continued from Page One)

bushel, and at New York in raw sugar, up 1 1/4 of a cent a pound; wool, cottonseed oil, cocoa, each up one cent a pound; raw hides crude rubber, up two cents; tin, up five cents, and raw silk up 15 cents.

Worth Street textile markets were in such confusion that many mills withdrew their schedules, and dealers were so overwhelmed with inquiries that many refused to answer their telephones.

Utho Barnes Joins J. C. Penney Store

Comes Here From Blytheville to Be Assistant Manager

Utho Barnes, of Blytheville, has joined the Hope store of J. C. Penney company as assistant manager in charge of the men's department. A. E. Stonequist, manager, announced Wednesday.

Mr. Barnes, 23 and single, has been with the Penney company at Blytheville for the last six years. He arrived in Hope Tuesday afternoon and assumed his local duties Wednesday.

Hope City Council

(Continued from Page One)

expenses of the city.

H. O. Klyer appeared before the council and requested the license fee and electric current collected by the Park Amusement Co., be donated to the Young Business Men's association, which sponsored the showing of the amusement company.

The council adopted a motion by Alderman Frank Nolan, seconded by Alderman F. D. Horry, that a resolution granting the request of Mr. Klyer be drawn and presented at the next meeting of the council for adoption or rejection.

The council ordered necessary lights be erected at the High School football stadium to enable the high school band to read music sheets. The council also ordered lights be turned on at the stadium Friday night when the football team will hold a practice game which will be free to the public.

A motion was adopted granting Police Chief Sweeney Copeland a two-week leave of absence to attend a school of instruction of State Police at Little Rock, beginning September 12.

The council appropriated \$174 to pay the cost of briefs filed with the supreme court in the Thompson county courthouse removal case.

A motion was adopted that F. C. Ward, druggist, be appointed to the Board of Health, succeeding Dr. L. M. Lile who has resigned.

The water and light committee was instructed to investigate roof conditions of the Fair Park exhibit building and care-taker house and obtain bids on repairing the roofs.

Rural Extension Line. C. O. Thomas, superintendent of the water and light plant, reported that the extension of the Shover Springs rural electric line had been completed and that current was turned on August 24. Length of the extension is 1.4 miles.

Mr. Thomas also reported that 12 property owners living on Radical Hill had asked that a water line be laid on Graham street between Eighth and Berry streets. Mr. Thomas estimated that it would cost \$246 to lay a two-inch line which would be of sufficient capacity to provide water for household purposes but which would not afford fire protection.

Mr. Thomas said that to provide fire protection in this area at a point two blocks of Bell street, which seems the logical point, it would cost an additional \$450 or a total of \$1196.

Future Farm House to Have All Comforts of City Dwellings---and Then Some!

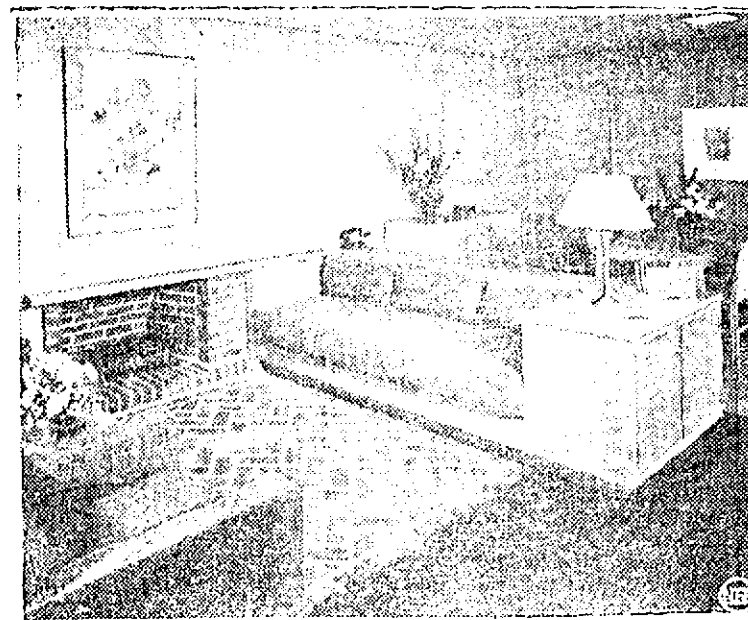

By MARIAN YOUNG
SEA Service Staff Correspondent
NEW YORK. Tomorrow's children will no longer be the old-fashioned and only to see the folks and get a whiff of fresh air, but to sit and admire again the houses in which they were born—houses of charm and beauty as well as comfort. Because, inside and out, the farm houses of tomorrow will be smart and ultra-modern from every point of view.

A far cry from the verandas and sagging "back stoops" of old-fashioned houses is the charming but functional terrace of the modern farm home. Notice the tile floor and the huge stone fireplace.

Gardens Come 'Round to Front of House
In general, the architectural design of the building, on the electrified farm, is determined by the many farm specialties which were chosen for the exhibit. Also by this of the most economical roof (single slope with light pitch), and by the placement of the windows where they most needed the south side in the case of the greenhouse, hothouse, poultry house, milk parlor, dairy and home paper.

Bedroom. The same wash room is easily accessible from the wide back porch, which adjoins the laundry.

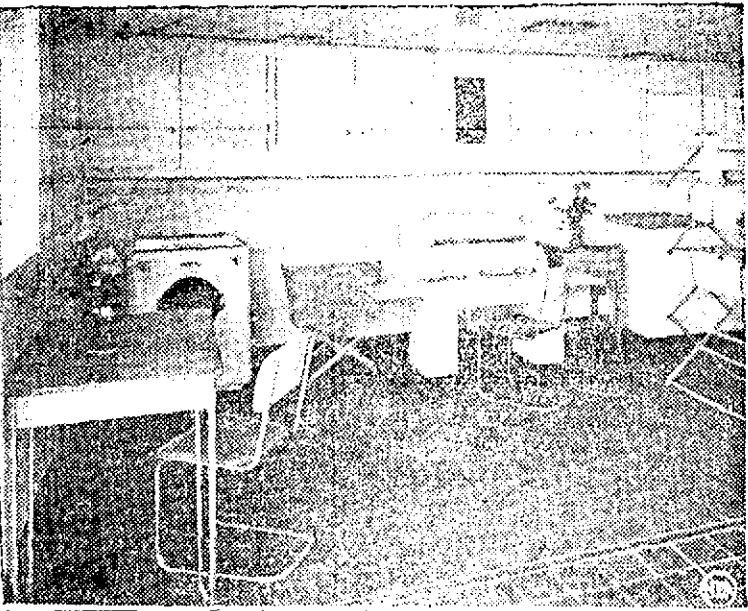

IN NEW YORK

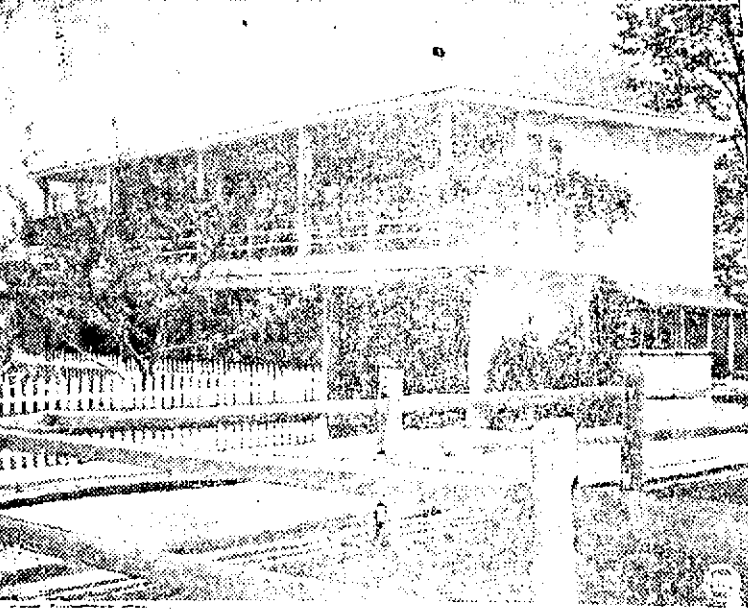

By GEORGE ROSS

NEW YORK. No Hollywood-Broad way house has more iron in the theatrical life than has George Jessel, whose married life with Norma Talmadge has just become public news. Some divorcees charge mental cruelty and others list a large variety of reasons for demanding their liberty. Norma, in effect, merely charged that George's work took him away from her too often and too much. Even Jessel would have difficulty denying it. For example, he now is the proprietor of one of the largest exhibits at the World's Fair and he is headlining a major vaudeville bill in Broadway.

The living room of the model farmhouse features a huge hearth, 6 feet out from the fireplace, a built-in sofa and large windows overlooking the gardens.

Along side the kitchen at the electrified farmhouse at the New York World's Fair is this completely mechanized laundry. A sliding door separates it from an adjoining back porch.

Here is an exterior view of the main house on the electrified farm. It is utilitarian to the 10th degree, yet really a thing of beauty. Garden is in front, rather than hidden in the backyard.

of the once-devoted couple must that they will be reconciled, and all strife forgotten, before the year is out. Welcome Harbinger of Cool Weather
The preparing child-bachelors of Gotham are facing the threatened these days with new courage and contempt. The happy news has come across the Hudson from the Palisades. The kateydid has been heard. The kateydid's reputation was once sounded on the ragged cliffs opposite New York, and folk are coming, by merely thinking about it. The kateydid, harbinger of frost, is the most welcome visitor to these parts at the season of the year. When he comes, a changeless, monotonous "Kateydid, it is not for us to question what Katey did, but to be content that winter is on the wing.
It is amazing how many sky-creepers and Manhattanites are concerned with the kateydid's speech. "Tired and insect who is really a popular fellow around Gotham at the height of the summer heat.
So now that he's here, a Hope Thanksgiving to you all, whenever it happens to fall by Presidential de-

Says Ford's Profit Less Than \$1 a Car

Company Has Produced One Third of All the Cars in World

Tom McPartly, manager of the Hope Auto Co., released the following statement taken from the congressional record. It is a speech by Congressman George A. Dondero of Michigan in the house of representatives June 23, 1939.

Mr. Dondero. Mr. Speaker, a few minutes ago in front of the Nation's Capitol a photograph was taken of the Michigan delegation with the twenty-seven millionth Ford car produced by the Ford Motor Co., of Detroit, Mich. It may be somewhat of news to you to know that this one company has produced one-third of all the cars made in the world, and during the last 10 years, according to the reports filed with the Federal Trade Commission, the profit of the Ford Motor Co., has been one-tenth of 1 per cent, less than \$1 per car.
Henry Ford is not making automobiles today because he needs bread; he is making cars in order that men may have work. For more than a quarter of a century Henry Ford led his world in the payment of high wages to the laboring man; and because of his mechanical genius he has made it possible for the common man, the poor man, to have and to enjoy one of the great conveniences of our day and age, namely the automobile. (Applause.)
161875-17096.

SO THEY SAY

We must never forget that here (in Russia) is the scum of humanity. Any alliance between the Reich and Soviet Russia would be the end of Germany. —Adolf Hitler, writing "Mein Kampf" in 1925.
No real fisherman would get any thrill out of catching fish all the time. —Dr. A. R. Gilliland, Northwestern University psychologist.
With Fascism on the march in Europe, we must stand guard against retrogression in education. —Dr. Franz Boas, Columbia University scientist.
We have, perhaps, interesting developments ahead.—Political spokesmen, in Germany.
A Frenchman is offering one of his eyes for sale. The democracies are in need of one to keep on Hitler.

Offer Reward for Return of Pet Skunk

Two-year-old Greg Mettle's pet skunk "Beau" is back home again in Columbus, O., as shown above, after being at large in neighborhood. Grandfather Mettle offered reward which pickaninny collected, bringing animal home in his shirt. Everything is under control, for skunk is docile—and docile.

Barber Shop Has Everything—Except Customers

MILWAUKEE.—(AP)—Next! Step right up and climb into the red plush chair of the "Gay Nineties" barber shop at the Milwaukee public museum—complete with mustache combs and a stack of pink Police Gazette.
Gaze at surroundings that enthralled the youth of the late 19th century as he sniffed pomades and rubbed his potential beard.
This exhibit has been a labor of love for Towne L. Miller, museum historian, and you'd be surprised how much time he spent in a quest for the last essential item—a shiny, 18-inch brass cuspidor.

John Olmstead of Arfordville (about 70 miles southwest of Milwaukee), finally produced a cuspidor of the proper cintage in answer to a plea broadcast by Historian Miller.
Now this receptacle takes its place beside the old straight-backed barber chair and below the wall case containing a score of shaving mugs, some decorated by the old "transfer picture" process, some hand-painted, and all bearing names or initials of former owners.

The striped pole outside, the old fashioned coal burning stove and a 19th century painting are larger objects of interest.

Then there are the fancy "stand bottles"—for toilet water and tonics—lining a shelf below a mirror. There are ancient perfume bottles, antiquated razors and scissors, a pewter talcum powder shaker, and one bottle—nearly full—of 19th century hair tonic.

Other centers of attraction are a hair-duster, which looks somewhat like a paint brush, and dainty mustache combs which once were used to remove cinders and such from the 1890 dandy's hirsute adornments.

Encouraging
Doctor: Your heart is quite sound. With such a heart you ought to live to be seventy.
Patient: But, doctor, I am seventy.
Doctor: There! What did I tell you?

Constipated?

"For years I had occasional constipation, awful gas bloating, headaches and back pain. Adlerika always helped right away. Now, I eat sausage, bananas, etc., anything I want. Never felt better." Mrs. Mabel Schott.

Bruce Catton Says:

Formation Combat Will Mark Air War This Time

By BRUCE CATTON
NEA Washington Correspondent
WASHINGTON—Nobody around here really knows, of course, just what the great European powers will do with their air fleets if the present crisis develops into a general war.

Military experts, however, who have made it their business to study trends in aerial warfare, have some pretty good ideas about what is likely to happen.

First of all, they remark that the ordinary civilian has a misconception of the tactics which probably will be seen. The famous single-handed combats of World War days—the "dog-fights"—familiar to movie-goers—are apt to be rare.

Instead, modern practice places emphasis on formation fighting. Fighting planes are believed more effective when they cruise in groups, flying high and waiting for a chance to swoop down on smaller enemy groups.

Berlin May Not Be Raided
It is considered doubtful here that British and French bombers will attack Berlin—not even in retaliation for possible German raids on London and Paris.

Instead, it is held, the British and French bombing forces are likely to concentrate on German industrial plants and railroad lines. And there is more than a hunch that the German bombers may operate in the same way, at least for a time.

Nevertheless, it is believed that a basic point of French and British air strategy will be to guard the great civilian centers in those countries from attack. This will call for aggressive action to "bottle up" the German air force, if possible, and decrease its effectiveness as a long-range striking arm.

There is still a good deal of uncertainty about the exact degree of effectiveness of anti-aircraft defenses. The supposition is that these defenses may be considerably more effective than is popularly supposed.

Army men point out that the only actual demonstration in recent years was in Spain, where the anti-aircraft equipment was neither as complete nor as efficient as that of England, and France. Even so, it is said, defensive activities in Spain made precision bombing difficult.

Pursuit Planes Chase Bombers
The chief effect of anti-aircraft batteries is to keep raiding planes so high that it is hard for them to drop bombs very near to their selected targets. Even better than the batteries are squadrons of fast pursuit planes.

DO YOU HAVE THESE SYMPTOMS OF MALARIA

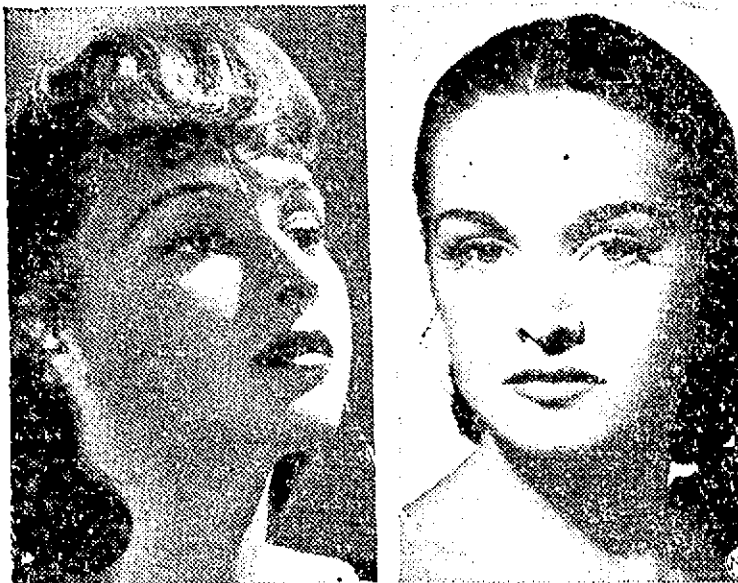

Small Expense Keeps Blood Clear of Germ
If you have any or all of the symptoms of malaria you should start today ridding your body of this poisonous germ. Malaria often shows up in one or more of the following symptoms—dizziness, nerves in legs and back, worry, nervous sleeplessness, dizziness, biliousness and constipation.

Feel Better In One Week Or Money Back
Mr. Nash, the head of the great company which makes Nash's C. & L. Tonic says, "Take Nash's C. & L. Tonic one week. If you don't feel worlds better take the bottle back to your druggist and he will give you your money back."

Nash's C. & L. Tonic is not an ordinary malaria remedy. Besides KILLING malaria germs, it also cleans the system, quickly attacking constipation and biliousness. Nash's C. & L. Tonic is at all druggists, 50c.

For sale in Hope by John S. Gibson Drug Co. And all other good drug stores.

Four Daughters? No, Just One Lane

This isn't a group of four lovely Hollywood sirens. It's just Rosemary Lane looking seductive, enchanting, glamorous, and alluring all at once. Wizardry of make-up artist and cameraman combine to give multi-beauty effect. Star of "Four Daughters" series, Miss Lane is here shown capable of playing all parts herself.

HARRISON IN HOLLYWOOD

Orson Welles Attacks Hollywood; Is Making First Movie By Himself

By PAUL HARRISON
NEA Service Staff Correspondent
HOLLYWOOD—Orson Welles, the wonder-boy of radio and the theater, sat in his rented mansion by the sea, twiddled his new beard and talked engagingly about his one-man assault on the citadel of the cinema.

He is uneasily aware that his position here is utterly without precedent. Until now, only Charlie Chaplin ever had the authority—or the audacity, either—to try to produce, write, cast, direct and play a leading role in a picture. But Chaplin had a lot of experience. The 25-year-old Welles came here about a month ago, an absolute stranger to the myriad complications of the movies.

According to all the rules, he hasn't got a chance. That's why the smug Hollywood hierarchy, with its patterned plots and ponderous, factory methods of production, is watching him with alarm. And for the same reason, all the real creators in town whose efforts and dreams are squelched by executive interference are rooting for "Heart of Darkness" to be a smash piece of entertainment.

"I've known for a long time that I'd come out here eventually," Welles said. "Four years ago, after I put on 'Macbeth,' I began talking with studios. But I had to have full authority—nobody telling me what to do, no story conferences with producers, who somehow seem to regard themselves as endowed by God to make decisions."

"Of course I'm a producer now, but I can't see that it means anything except that I have a desk and an office, and now and then I can call myself in and give myself hell."

Wanted Orson For Hunchback
Each of the major studios approached Welles for acting, writing or directing assignments, but not until he talked with George Schaefer at RKO—a studio which has been giving more and more authority to its directors—did he get what he wanted—which was everything. That agreement was made a year ago and Welles didn't have a story in mind at the time. Recently the studio wanted him to play "The Hunchback of Notre Dame." He declined, saying that instead he would like to come out and

Tennis Tourney Opens On Monday

First Rounds Are Played At Fair Park Monday Afternoon

The opening matches for men's singles in the southwest Arkansas tennis tournament were played at Fair Park Monday afternoon.

Mark Buchanan defeated Boyles, Gordon entry, 6-1, 6-0. In the junior boys division, Keys of Gordon won over Richard Stanford of Hope, 1-6, 6-3 and 6-3.

John Culp of Gordon defeated George Ware of Hope in the best match of the day, 6-3 and 6-2. Early Archer defeated Clinton Jones, 6-1 and 6-3. Charles Gregory won over Mark Buchanan, 6-3 and 7-5.

Gregory and Willis Smith are scheduled to meet Tuesday afternoon for a place in the quarter-finals. What promises to be a good match in the doubles will be the play Tuesday afternoon of Taylor and Smith against Culp and Ware.

make a movie version of Conrad's "Heart of Darkness."

"What happens from now on is entirely up to me," Welles admitted. "Nobody can read my script; nobody can cut my picture. They can't even come to see the rushes."

"I'm scared, but not as scared as I was. Because I find that although nobody is trying to boss me, everyone is trying to help me. The theater is full of complacent men who believe the artistic and technical millennium has been reached. But pictures are a young business and most of its people are not yet bored or spoiled."

"Almost every evening I've been seeing three or four hours of selected pictures, from silent to the newest spiet, to study film technique. A director, cameraman, art director goes into the projection room with me and they explain different phases of production. Most of 'em have theories of their own, ideas they'd like to try, and you ought to see their eyes light up when they talk. With that sort of vitality and interest, the movies can do anything."

Beard Draws Stares
Welles grew his beard for a play, "Five Kings," and kept it for this picture. "I figured Hollywood was one place in the world where it wouldn't be noticed," he said, "because I knew that players often went around in whiskers and long hair. But I can't get by with it. People seem to think it's an affection or an insulting gesture, or something; they attack me in restaurants and hoot at me on the streets."

Besides himself, Welles cast in "Heart of Darkness" will be made up of actors straggled to Hollywood. The members of his Mercury Theater will come here in October to work in the picture. His company doesn't include a suitable leading woman, but whatever one he hires will be imported from the stage or foreign films.

Just now he's concentrating on the eight hours a day recording his rapid story. Two secretaries are kept busy dictation or treatment and character development. Five heavy volumes of manuscript represent his efforts to get everything thoroughly in mind. The actual script hasn't been begun yet.

Manager Dykes
CHICAGO — Jimmy Dykes must have been very outspoken when chased by Umpire Cal Hubbard in a recent game with Detroit. A few days later in St. Louis, Fred Haney flared up at Hubbard, wound up with: "And what Dykes told you goes for me, too!" Haney drew the same penalty Dykes did—a three-day suspension and a \$50 fine.

MIND YOUR MANNERS

Test your knowledge of correct social usage by answering the following questions, then checking against the authoritative answers below:

1. Should a woman attending church, or a wedding in a church wear hats?
2. Is a tailored suit "dressed up" enough for a woman guest to wear to a tea?
3. Should a college girl applying for a job wear the sweater, skirt and saddle oxfords that were

appropriate for the campus?

4. Should a woman, living in the country, dress in street clothes when she goes to a nearby city to have lunch?
5. Is an all white outfit suitable for street wear in a large city?

What would you do if —

You are a woman invited to a formal evening wedding—and are, of course, going to wear evening clothes. Would you—

- (a) Go bare-headed?
- (b) Wear a scarf over your head and keep it on while you are in church?

Answers

1. Yes.
2. Yes.
3. No.
4. Yes.
5. No.

Best "What Would You Do?" solution—(b).

Want to Buy a Jail?

KANSAS CITY, Mo. —(AP)—Lafayette county's jail—with locks, bars and padded cell—is for sale. It's given good service for 30 years but a new one soon will be completed.
